AIRMATIC®

WE'LL HANDLE IT.

AIRMATIC founded in 1944, is a woman-owned Industrial Distributor, with installation and maintenance capabilities, offering equipment, machinery, and shop supplies to the Industrial, Construction, Utility, Government, and Commercial Markets. Our products and services are sold through three business units:

The **MATERIALS MANAGEMENT GROUP** provides products and services to industries that convey, store, transport, and process powders and bulk solids from aggregates, cement, and chemicals to foods, grains, metals, power generation, and waste water treatment applications;

The **SERVICE GROUP** provides fabrication, installation, and maintenance services to improve bulk materials handling efficiency; mechanical clean-out services for silos and hoppers to eliminate material flow problems; and shop repair/rebuilding and modifications services of products sold by the Company.

The **TOOL GROUP** provides power tools, personal protective equipment, materials-handling equipment, shop equipment and MRO supplies used for production, fabrication, assembly, metal removal, maintenance, and storage in manufacturing, construction, utility, and commercial applications.

Our Customers tell us that by choosing AIRMATIC to solve their problems, they gain increased productivity, decreased costs, and a safer, cleaner work environment.

KODI KLIP®
Rebar Connection Systems

KODI KLIP. Fastening rebar with wire ties is an expensive process that can injure workers, create construction bottlenecks and increase maintenance costs, while still producing unstable and inconsistent connections. The innovative KODI KLIP Rebar Fastening System eliminates these problems. The KODI KLIP System utilizes a magazine-fed, lightweight, air operated KLIPPING TOOL to shoot molded, recycled, polycarbonate resin KLIPS onto rebar connection points. The K-KLIPS provide a secure, four-way grip which won't damage rebar, corrode, or loosen under load. The System design saves time and effort by enabling the work to be done directly on the surface it is placed on, eliminating the need for lifting and propping-up the rebar while fastening it. The robust K-KLIPS produce far more rigid connections than traditional methods, enabling assembled units to be built and handled safely.
